## $4^{\text {th }}$ Math Review: Due April 5

1. Solve. Shade in to represent. $\frac{3}{4}=\frac{\square}{8}$|  |  |  |  |
| :--- | :--- | :--- | :--- |
| $\square$ |  | - |  |
2. Solve. Shade in to represent. $\frac{1}{4}+\frac{1}{4}=$

3. Solve $27 \times 54$

Answer =

Factors

| 8: |
| :--- |
| $11:$ |
| $20:$ |
| $24:$ |

5. Solve and show your work.

A library checks out 4 fiction books and 2 non-fiction books every 15 minutes. How many fiction books do they check out in one hour?
